

I am writing because I am a XM Radio listener and I am against the National Association of Broadcaster's Petition No. 04-160. I believe that XM Radio is providing a valuable public service by transmitting local traffic and weather information. More to the point, how is the public better served by stopping it from doing so?

Of course, the answer is that the public is not better served by denying it another avenue to local traffic and weather information.

Accordingly, please deny the NAB's Petition No. 04-160.
